

## eSupply GPO Unleashes Your Purchasing Power

*Manage more expenses and reduce more costs.*

Effective spend management is key to competitive differentiation and profitability. While it's easy to see the results of great deals and discounts, actually finding them can be a different story.

GPO stands for "group purchasing organization." Group purchasing unites the buying power of many property management companies with a strategically selected group of multifamily suppliers to produce powerful results. eSupply GPO from RealPage® is a fully integrated spend management solution with a different approach that delivers benefits at every level including:

**Savings:** Realize measurable cost savings that increase NOI.

**Network Access:** Leverage pre-negotiated discounts from strategic multifamily supplier partners, with the flexibility to remove or keep existing deals.

**Compliance:** Encourage your properties to buy from approved vendors.

**Transparency and Visibility:** Receive quarterly reports that outline spend.

**Efficiency:** Reduce sourcing and procurement expenses and lower transaction costs.

**Negotiation and Communication:** Work with expert advisors who help manage your network of preferred vendors.

If you are lacking a purchasing staff, questioning product purchases at your properties, or wanting to close the gap between real and potential savings, eSupply GPO is the key to realizing more profitable business results.
